PATH's FY2019 Annual Report

PATH, Inc.

201 E Grove Street, Suite 200, Bloomington, IL 61701

309.828.1022

kzangerle@pathcrisis.org

Director's Note

The annual report reflects the complexities of PATH. Throughout the years, we worked to stay true to our mission: Providing Access to Help to improve and save lives. In FY2019, we maintained three departments of service: 211/Crisis Call Center, services for people experiencing homelessness, and Adult Protective Services, uncovering abuse of people with disabilities and older adults age 60 and over.

This is written in the time of the pandemic, which has had its effect on the bare-bones structure of this document. But indeed we are in our finest hour; connecting people with vital services.

Division Reports

211/Crisis

211 is an easy-to-remember number that connects people to the help they need. It is a free call and we cover 44 counties.

Outcomes from 2019

Objective 1:

Call center specialists are trained in national best practices to properly recognize and intervene in suicide situations, ensuring we meet the 90% figure that suicide call resolutions are positively correlated with the lethality assessed within those calls. During training, call center specialists learn via a multi-faceted approach: through monitoring calls from experienced volunteers, practicing their own role plays which simulate suicide calls, and reading the policies and procedures for intervention, safety assessment, and safety planning, as outlined by NSPL and AAS.

Training also includes learning how to use our database in conjunction with crisis assessment. Through exercises and monitoring of experienced volunteers, new trainees learn how to provide appropriate behavioral health linkages, ensuring we meet the mark of providing at least 4,000 linkages each calendar year. The Database Manager ensures that information is up-to-date on policies for all organizations so that the person answering the call can connect to appropriate referrals.

Our strategy to make certain we meet national standards for abandoned call rates, wait times, and service levels is two-fold: we need to sufficiently staff the call center (see objective 2 below), and we need to properly utilize technology. Currently, we use a cloud-based automated call

distributor (ACD) in our call center. Through this system, we can **easily run reports to monitor** abandon rates, and we view in real-time how many people are calling in addition to caller wait times and service level. We look to see where our highest call volumes are during the day, on average, and staff accordingly. During business hours, we also have staff backing up volunteers from their offices—our call system can be accessed from anywhere with an internet connection, safeguarding what would otherwise be missed (abandoned) calls.

All strategies are supported through PATH's professional staff, who provide 24/7 back-up and support to the crisis call center specialists.

Objective 2: Our goal is to train a minimum of 70 new volunteers each calendar year, and when those individuals begin training, we will retain 80% of them through the completion of their training. This ensures sufficient staffing to handle our call volume. Strategies include transparency about the expectations of training/volunteering when new applicants enter the program, recruitment efforts year-round (including relations with the local universities, hospitals, religious organizations, agencies, and businesses in the area), and maintaining a training curriculum that is engaging, challenging, and rewarding for participants. Additionally, PATH's professional staff provides 24/7 back-up and support to the volunteer call center specialists.

These general objectives'/goals' progress are measured by the outcomes. See the questions below for progress/performance indicators.

Outcome 1.2: Staff runs quarterly reports through ReferNet (our database software) to count behavioral health linkages.

Outcome 1.3: Staff runs quarterly reports through inContact (our cloud-based call system) to measure call center statistics.

Outcome 2.1: Staff calculates the retention rate by dividing the number of trainees a class finishes with by the total amount of trainees that class began with. This will yield a decimal amount that we convert to a retention percentage.

Outcome 2.2: Staff counts how many new volunteers each of the three training classes yield per calendar year.

Outcome 1.1: Staff review suicide call logs quarterly or as needed to ensure the 90% figure.

FINAL OUTCOMES

Objective1

Prevent suicide.

Outcome1

90% of suicide calls will positively correlate with the level of lethality recorded with the call resolution.

Actual: 94.9% positively correlated.

Objective2

Connecting callers with behavioral health issues to appropriate resources or provide support.

Outcome2

4,000 linkages to appropriate crisis services.

Actual: 3,848 linkages.

Objective3

Availability of the service will meet national standards.

Outcome3

Abandoned call rates below 9%; Average wait time for caller less than 40 seconds; 80% of calls answered within 90 seconds.

Actual abandoned call rates: 14.6%. Actual average wait time for a caller: 48 seconds. Actual percentage of calls answered within 90 seconds: 77.5%.

Adult Protective Services

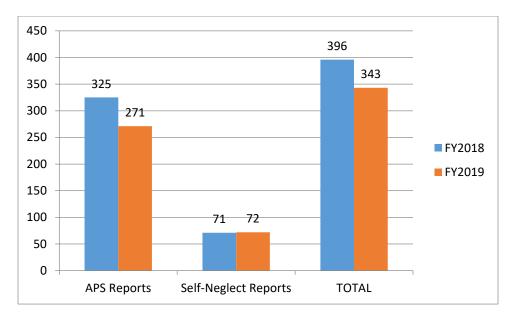

Report Data for two years.

Years/Reports	FY 2018	FY 2019
APS Reports	325	271
Self-Neglect	71	72
Total	396	343
After Hours	3,361	2,948

PATH provides after-hours intakes for the Illinois Department on Aging's statewide 800 number, including weekends and holidays.

After-hours reports are up 11% from the same period last year.

In January 2019, new legislation passed that allows APS to investigate financial exploitation in licensed long-term care facilities if the exploitation included a family member, caretaker, or another person who has a continued relationship with the alleged victim and is not an employee of the facility. Before, The Long-Term Care Ombudsman handled these cases. Due to limitations of the Ombudsman program to investigate these types of cases, legislators amended the Adult Protective Services Act to allow APS providers jurisdiction to investigate in licensed facilities.

PATH provides after-hour intakes for the Illinois Department on Aging's statewide 800 number, including weekends and holidays.

Homeless Services

1.2 Persons in ES, SH, TH, and PH (prior to "housing move

in")
